

A good old fashioned nature park

This project involves constructing a fun outdoor playground featuring wood equipment, sand boxes, tires, obstacle games, outdoor classrooms, etc.

Our school playgrounds are mostly used by children in our community Monday to Friday and during weekends and vacation time. At least 437 students at école Amirault use the playground.

Because part of the Amirault playground has become dangerous, steps have been taken to address the problem. However, the parents committee wants to increase play opportunities in order to promote children's creativity, physical activity and overall health. Dieppe parents and some residents have already started giving their financial and service support to the project. In this regard, the City of Dieppe's participatory budget is directly aligned with our vision. To optimize our playground, while ensuring that we promote children's creativity through play, the focus of the kindergarten program, we are seeking your financial support through the participatory budget. More pictures are available on the [www.earthscapeplay.ca](http://www.earthscapeplay.ca) website.

Location: École Amirault, 1070 Amirault Street

Cost: \$63,000
